

Klove, Airl and KBPS are my most important radio stations. I listen to them because they are commercial free and give me the music I enjoy. I do not find any other stations that give me this same experience. If these stations were to be replaced and sent to LPFM I would not be able to listen to anything on the radio. I and several of my friends would stop listening to radio altogether and switch to our cd players instead. These stations are uplifting and provide family centered musical entertainment. The community would lose 3 positive listening choices amidst the depravity of stations otherwise available. It is in the public interest that we keep these stations in the FM bandwidth, rather than relegating them to the LPFM. Thank YOu
